

SPECIFICATION AMENDMENTS:

Please replace paragraph [0023] of the application with the following amended paragraph:

[0023] Referring to FIG. 7, another illustrative system for determining and communicating proximity information is shown. The system includes a cradle 704 housing a removable and mobile communication device 702. The cradle 704 is coupled to a personal computer 706. The computer 706 is connected to a network access point 708, such as a modem, broadband modem, router, or data network switch, which is coupled to the interconnected network 710. An example of the interconnected network is the Internet. The computer 706 includes a call redirection module ~~708~~ that may perform functions similar to those described with respect to the call control module 604 and may be used to communicate location data, proximity germinations, and other messaging associated with the proximity system.
